

POZ

Technical Data Sheet

POZ

Designer: Alp Nuhođlu

With the natural wooden coated back detail, Poz sofa radiates a warm yet sleek feeling. It is available in leather and fabric.

DESCRIPTIONS

STRUCTURE

The entire frame is constructed from 2nd class kiln-dried solid beech wood, using wood profiles with dimensions of 50x25 mm and 25x25 mm. The armrests are made from 18 mm thick chipboard, reinforced with 3 mm hardboard (duralite). This combination of materials ensures the durability and stability of the structure while maintaining a lightweight

UPHOLSTERY

The backrest is padded with 30 cm thick foam with a density of 25 kg/m³, specifically a feather-like foam known for its softness and comfort. The backrest is upholstered in either synthetic leather or fabric, providing a choice between a more luxurious or a more traditional finish.

The seat cushion is made with a 14 cm thick foam with a density of 35 kg/m³. This foam, also feather-like in texture, provides a firm yet comfortable seating experience. The seat is upholstered in either synthetic leather or fabric, matching the backrest for a cohesive look.

ARMREST

The armrests are padded with 10 cm thick high-resilience (HR) foam, with a density of 35 kg/m³. This foam provides both comfort and durability, ensuring that the armrests retain their shape and support over time. Like the seat and backrest, the armrests are upholstered in either synthetic leather or fabric, matching the overall design of the sofa.

METAL LEGS

The legs are made from DKP (deep drawing steel) sheet metal profiles, measuring 20x20x1.5 mm and 40x35x1.5 mm. The metal is shaped into box profiles, providing a strong and stable base for the sofa. The legs are finished with an electrostatic powder coating, applied in a kiln for durability and resistance to wear.

ACCESSORIES

Foot Glides: The sofa is equipped with plastic foot glides, which are fitted into the 20x20 mm metal leg profiles. These glides prevent direct contact between the metal legs and the floor, protecting both the sofa and the floor from damage.

USAGE AREA

The Poz Sofa is designed for use in waiting areas, office rooms, and residential interiors.

DESIGNER / COLLECTION

The Poz Sofa was designed by Alp Nuhođlu as part of the 2020/2021 collection.
