

MILA STORAGE GROUP

Technical Data Sheet

MILA STORAGE GROUP

Designer: Adnan Serbest

With its minimal details and sense of simplicity, the Mila collection stands out, offering a coherent design that creates shared workspaces where employees can feel comfortable, with various size alternatives.

DESCRIPTION

METAL STRUCTURE

In the Shelf-Storage System Group, all wooden parts are made from 18 mm thick, melamine-coated particle board.

The bookshelf shelves are composed of three parts: front piece, back piece, and intermediate divider for each shelf. All wooden parts can be produced in the full range of colors and patterns from the Zivella Melamine Colors Catalog.

WOODEN STRUCTURE

The bookshelf legs are made from 20x20x1.5 mm metal profile material. They can be painted in any static color from the Zivella Metal Colors Catalog.

ACCESSORIES

The shelf panels and dividers are connected to each other and to the legs using Minifix and Plastic Dowel connection elements.

Adjustable plastic bingo feet are used on the surfaces of the metal legs that come into contact with the floor.

The cabinet body is made from 18 mm thick particle board with a 45-degree joint detail, forming a monoblock structure.

The cabinet doors use two non-soft-closing hinges. The doors are handle-free, utilizing a push-to-open mechanism.

A total of three cabinet modules can be mounted on a single shelf. The cabinet modules are produced in a demountable form and are intended to be assembled by the user in a personalized space.

USAGE AREA

The Mila Storage Group is designed for executive offices, meeting rooms, and workspaces.

DESIGNER / COLLECTION

The Mila Storage Group was designed by Adnan Serbest for the 2022/2023 collection.
