

KUZ

Technical Data Sheet

KUZ

Designer: Alp Nuhođlu

Comfort designed with the elegance and fineness from the harmony of massive wood and fabric... Zivella Kuz was designed with simple lines to add extra elegance to executive rooms, waiting areas or private living spaces.

DESCRIPTIONS

FRAME

Seat: The seat frame is constructed from 2nd class kiln-dried solid beech wood. Over the wooden frame, a 10 cm thick 35HR high-resilience foam is applied for cushioning. The seat is then fully upholstered, providing a comfortable sitting experience.

Backrest: The backrest is crafted from a combination of 2nd class kiln-dried solid beech wood and 4 mm MDF (Medium-Density Fiberboard). It is upholstered with 5 cm thick foam, with a density of 25 DNS, which offers a soft and supportive back surface for users.

Armrest: The inner structure of the armrest is made by compressing 4 mm thick hardboard sheets. This inner core is then padded with 1.2 cm thick foam, which has a density of 14 kg/m³, to ensure a comfortable and durable surface. The armrest is upholstered to match the overall aesthetic of the chair.

WOODEN LEGS

BRK1350, BRK1351, and BRK1352 models: The legs of these models are made from 1st class kiln-dried solid ash wood. The use of ash wood ensures durability and a high-quality finish.

BRK1360, BRK1361, and BRK1362 models: The legs for these models are produced from 2nd class kiln-dried solid beech wood, which provides a sturdy base for the furniture.

Finish: To protect the wooden surface and extend its lifespan, the wood undergoes a meticulous finishing process. First, three coats of polyurethane filler varnish are applied to fill and seal the wood pores. This is followed by two coats of polyurethane matte finish or, in some cases, lacquer paint. This treatment not only enhances the appearance of the wood but also protects it from external factors like moisture and wear.

ACCESSORIES

Foot Glides: To prevent direct contact between the wooden legs and the floor, which could cause damage to both the legs and the flooring, plastic foot glides are fitted at the base of the legs. These glides, also known as "bingo" foot glides, are specially designed to fit securely into the legs, providing stability and protection.

USAGE AREA

The Kuz furniture range is designed for use in various settings such as waiting areas, office rooms, and residential interiors.

DESIGNER / COLLECTION

The Kuz range was designed by Alp Nuhođlu as part of the 2020/2021 collection.
