

SAHARA

Technical Data Sheet

SAHARA

Designer: Alp Nuhođlu

Offering a comfortable session with its simple lines, Sahara also provides ease of installation with its completely removable metal skeleton. While changing the mood of the offices with its durable body, striking design and colors; meets all needs of waiting areas with its comfort.

DESCRIPTION

METAL LEG

Metal legs are made of Q25x1.5 mm DKP pipe shaped in special molds. The metal legs are monolithic with 40x10 metal llama and 5 mm thick DKP sheet metal, and the connection to the seat is made with this llama. Metal chassis is manufactured from 50x5 mm llama and 20x20x1.5 mm metal box profile material. On the metal foot surface; 90 micron thick (textured) electrostatic powder oven paint is used.

WOODEN FRAME

The wooden seat frame is made of 10 mm thick CNC cut particle board. Integrity is ensured by laying and mounting a 50x50 mm piece of first class beech solid wood in front of the seating structure.

BACKREST FRAME

Backrest frame is manufactured by CNC bending of Q19x1.5 mm DKP pipe. It is monolithic with a 30x5 metal bar, and it is attached to the front and back cushions with this bar.

ARMS

Arms' wood frame is made of 30 mm thick CNC cut particle board. 10 mm thick sponge with 28 DNS density and fabric are covering it.

UPHOLSTERY

Back cushions are filled with bead silicone material and covered with fabric, which ensures that it maintains its form.
Seat; 20 mm feather foam with 25 DNS density and fabric are covering 50 mm thick foam.

ACCESSORIES

Q21mm glides made of rigid plastic material are located under the bottom of the product that is in contact with the ground.

AREA OF USE

Sahara is designed for interior spaces such as executive rooms and waiting areas.

DESIGNER / COLLECTION

Sahara Product Group is designed by Alp Nuhođlu for 2020/2021 collection.
