Overview of Phase	03
Solutions for the Product Group	08
2D Drawings	10

The Phase family, with its modular structure and options with or without tables, offers various solutions suitable for waiting areas, facilitating communication in common areas.

## Phase

Designed with both comfort and ease of use in mind, the Phase family can be easily configured for different spaces and needs thanks to its modular structure.

With table and ottoman modules, the Phase family meets functional needs while responding to seating scenarios created in the space. It stands out with its modularity, strengthening communication in shared spaces with many different configurations.

The Phase waiting unit has a wide range of uses. It is ideal for offices, hotels, hospitals, airports, and other public spaces.

The simple lines and fine details of the product create a fresh and orderly atmosphere in its environment. Phase adapts to various interior designs with different color and upholstery options.

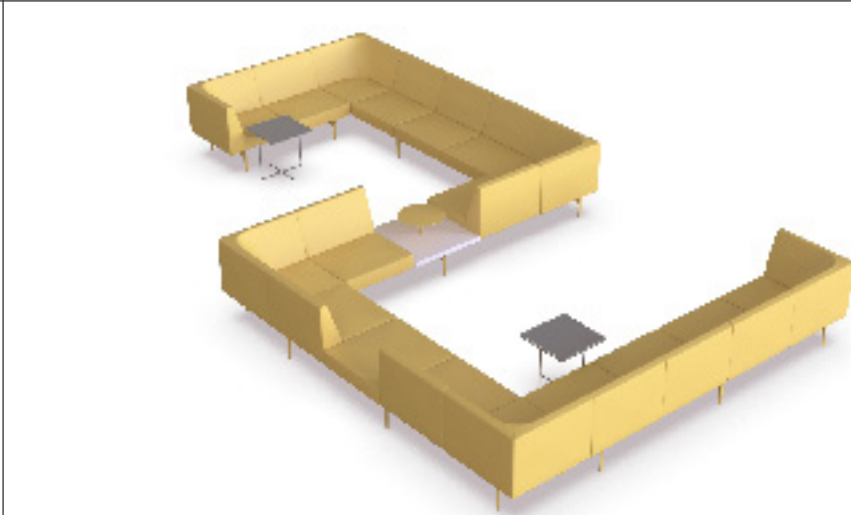

## Solutions for the Phase Product Group
